

How It Works

HIT Anti Roach Gel is an innovative product that eliminates cockroaches from its nest.

Step 1

It attracts to cockroach towards it and the cockroach eats the gel

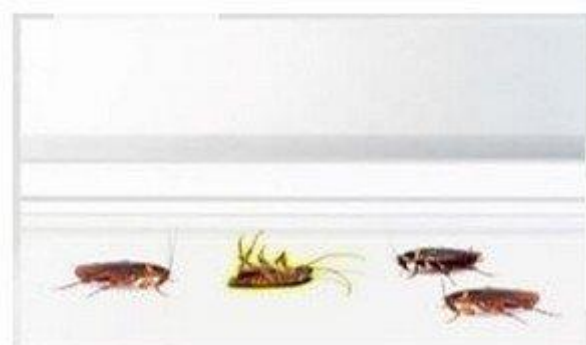

Step 2

Once the cockroach eats the gel it gets infected.

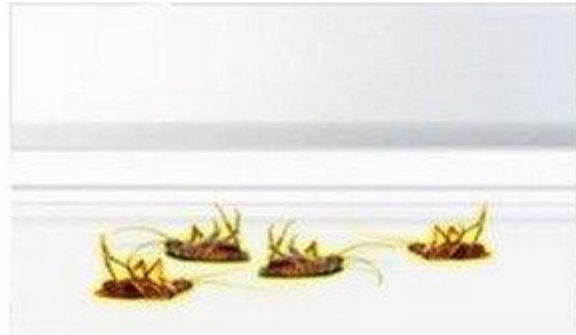

Step 3

The infected cockroach goes to its nest and dies. Other cockroaches eat the dead cockroach.

Step 4

The other cockroach also get infected and they die, eliminating entire cockroach nest along with the eggs.

You may now enjoy the cockroach free home and kitchen. For best results apply after every 45 days.

How To Use

Step 1

When using it for the first time, click the tube for 7-8 times until the gel comes out. After this the gel will come out in just one click.

Step 2

Use the gel in places where the existence of cockroaches are high, e.g.: corners of the kitchen shelves, side draws, below kitchen sink, under gas cylinder, under microwave, fridge hinges etc.

Step 3

Repeat procedure every 45 days. Make sure you do not put the gel in places from where it can be easily washed off.
